2024 ROBINS REQUIREMENTS SYMPOSIUM - THURSDAY, MARCH 28TH, 2024

HOSTED BY: NATIONAL DEFENSE INDUSTRIAL ASSOCIATION (NDIA) CENTRAL GEORGIA CHAPTER AND ROBINS AFB

2024 theme: "Robins Enterprise: Sustaining the Future Fight".

Over **550** attended the NDIA Central Georgia Chapter and Robins AFB co-hosted hybrid conference at/from the Museum of Aviation, Century of Flight Hangar, 1942 Heritage Blvd, Robins AFB, GA. We were fortunate to have the Honorable David Norquist, NDIA President/CEO on site to welcome all attendees and to provide insightful information regarding how the NDIA (National Defense Industrial Association) is contributing to "The Great Power Competition". Senior leadership from AFSC and AFLCMC – Ms. Angela Tymofichuk and Mr. Dennis D'Angelo, respectively shared future vision and requirements from AFMC that could result in competitive business opportunities for industry.

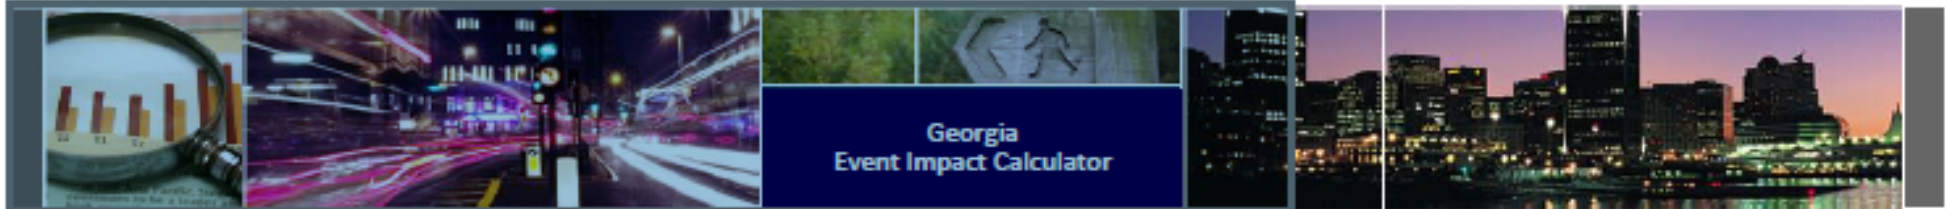

This one-day event was designed to inform the private sector on portfolio focus areas and acquisition forecasts at Robins AFB necessary to accomplish its mission "to provide War Winning Capabilities on Time, on Cost." We accomplished this goal by bringing interested parties together for a series of presentations by leaders of Air Force Life Cycle Management Center (AFLCMC), Air Force Sustainment Center (AFSC) and other Robins AFB organizations. These briefings helped characterize the requirements necessary to further the Robins AFB mission. Participants had the opportunity to learn more about the capabilities of Robins AFB as well as requirements that will be satisfied by contracts awarded to large and small businesses. The agenda concluded with a complimentary Networking Reception immediately following AFLCMC (Air Force Life Cycle Management Center) Program Executive Officers providing overviews of their respective portfolios managed out of Robins AFB.

Central Georgia Membership Meeting
Thursday – 1 August 2024
0930-1130
MERC Auditorium
135 Osigian Blvd.
Warner Robins, GA 31088

Guest Speaker: Mr. Mark Casey, Director – Test Program Integration Directorate
“Redstone Test Center, Huntsville, AL”

In April of 2024, the Redstone Test Center (RTC) hosted a group of engineers from Robins AFB, GA. In the initial meeting, it became clear that many of the test capabilities and engineering services that RTC has could benefit the Robins mission. For RTC’s visit to Robins AFB and brief to Robins AFB NDIA group, RTC hopes to establish a relationship that will facilitate RTC supporting and collaborating with Robins AFB in the future. RTC’s test and engineering services coupled with the proximity to Robins AFB could be of substantial benefit to both organizations. Additionally, RTC and Robins AFB are engaged in some similar activities where collaboration on new/evolving technologies (Cyber, Additive Manufacturing...) could benefit both organizations.

Mark Casey Biography

Mr. Casey was born in Slocomb, Alabama and earned a Bachelor of Science Degree in Electrical Engineering in 1985 from Auburn University. He is a member of the Army Acquisition Corps and has been involved in testing in various capacities his entire career. During his career, he has served as an airborne instrumentation engineer, flight test engineer, Assistant Division Chief for both a Flight Test Division and the airborne instrumentation Division at Redstone Test Center (RTC). His experience spanning over 35 years has touched various capacities associated with testing of Army Aviation, sensors, and missiles. Currently, Mr. Casey is the Director for RTC’s Test Program Integration Directorate (TPID). His Directorate is responsible for programmatic oversight for all test programs assigned to the RTC. The RTC test portfolio includes over 800 active projects dealing with life cycle testing for Aviation, Missile and Sensors commodities for the entire Army.
